# Optimal Performance TRAINING & BUILDING CAPACITY

- CDMA Business Model provides training and workshops on Digital Media & A/V Technology for professional development that supports 21st Century Staff in Career and Technical Education.
- We equip educators, administrators and staff with the necessary knowledge and skills that will empower themselves while encouraging student leadership. We guide and assess the effectiveness of how schools and organizations facilitate connections with industry professionals to grow a specialized program.
- Our focus is grounded in global digital citizenship to ensure that students are well-prepared for various career pathways by way of applying strategies making them more competitive in the job market.
- With an extensive network of industry professionals and partnerships, CDMA Business Model has the ability to connect students with relevant resources, mentorship opportunities, and work-based learning experiences.

## Innovative Strategy

CDMA Business Model offers innovative solutions in Digital Media & A/V Technology, that are specifically designed to enhance career readiness and work-based learning initiatives. Our robust platform affords educators to seamlessly cross integrate curriculum, practicals and establish a network of connections from the comfort of their school site.

## Transformative Design

Through targeted digital marketing techniques, CDMA Business Model helps schools and organizations reach their desired audience and engage with industry stakeholders effectively.

- **User Experience (UX) Design:** Creating engaging and intuitive user interfaces for digital media platforms, ensuring seamless user interactions and experiences.
- **Visual Design:** Developing visually appealing graphics, illustrations, and multimedia elements to enhance the aesthetics and impact of digital media content.
- **Interaction Design:** Designing interactive elements and functionalities that encourage user engagement and participation within digital media platforms.
- **Information Architecture:** Structuring and organizing content in a logical and user-friendly manner, facilitating easy navigation and information retrieval within digital media platforms.
- **Responsive Design:** Adapting digital media platforms to be compatible and optimized across various devices and screen sizes for a consistent user experience.
